

## What is AgriSafe?

AgriSafe is a regional network of clinics that specialize in occupational health and safety needs of farm families and related agribusinesses. Staff include health care providers who specialize in agricultural occupational health and trained farm safety specialists.

## What is Certified Safe Farm?

Certified Safe Farm (CSF) is a voluntary agricultural health and safety program that addresses the hazards of farming and the need to reduce illnesses and injuries on farms. A trained farm safety specialist performs an on-site farm review with participation from the farmer. A total farm score is computed and a score of 85% or higher designates a "Certified Safe Farm."

## Statewide Affiliation

This clinic, along with other regional clinics, statewide, are constituents of the Iowa Center for Agricultural Safety and Health (I-CASH). Our mission is to coordinate and focus the state's resources to establish any program that improves the health and safety of the agricultural community. This affiliation provides benefits that includes accessible agricultural data, statewide screenings, and educational programs and support.
